

Insider Trade Marker Information

Why Use TMX Datalinx Insider Trade Marker Information?

- ✓ To help develop algorithmic trading strategies
- ✓ To get an "early warning" that insider activity is going on
- ✓ For additional information that may help with investment decisions
- ✓ It is the most timely indicator of Canadian insider trading activity – data provided same day
- ✓ For valuable signals about a company's prospects because of the first-hand knowledge that directors and senior managers have about their businesses and industry
- ✓ Direct from source data is authoritative and timely

Product Description

The Insider Trade Marker provides a security level, daily summary of insider buying and selling activities for the Toronto Stock Exchange and TSX Venture Exchange. Information is based on a trade-related marker provided to TMX by brokers at the time a company insider either buys or sells a security. It is more timely than any other public source of Canadian insider trading information, including the regulatory site System for Electronic Disclosure by Insiders (SEDI), where Canadian insider trading information must be reported within 10 calendar days after the transaction.

Data elements include:

• Symbol	• Buy and Sell Value	• Number of Buy and Sell Transactions
• Buy and Sell Volume	• Currency	• Correction Date

Features

- Toronto Stock Exchange coverage
- TSX Venture Exchange coverage
- Corrections to current and prior reports provided daily
- Available as an **end of day tab delimited report** or as an **end of day message feed**
- Basic tab delimited ASCII format is easily integrated into systems

Delivery

- FTP, web, email and end of day data feed
